

FixIt Egypt — Website & Platform Brief

1. Business Model & Platform Type

Business Model

FixIt Egypt is a service marketplace platform connecting customers with verified home service professionals. The company operates on a commission-based model, earning a percentage from each completed booking.

Revenue Streams

- Commission per completed job (15–20%)
- Future subscription plans for professionals
- Emergency/same-day service fees
- Potential future B2B/property management partnerships

Platform Type

Two-sided marketplace:

- Customer side
- Service provider/technician side

Initial launch will operate through:

- Website
- WhatsApp-first operations

Future expansion:

- Mobile application (iOS/Android)

2. Target Audience & ICPs

Primary Customer ICP

Persona: “Busy Cairo Professional”

- Age: 25–55
- Location: Maadi, New Cairo, Zayed, Heliopolis, Zamalek
- Upper - middle to upper income
- Working professionals, families, expats
- Digitally comfortable
- Values convenience, reliability, and speed

Customer Pain Points

- Unreliable technicians
- Unclear pricing
- Delays/no-shows
- Difficulty finding trusted workers
- Lack of accountability

Buying Drivers

- Fast response
- Professional communication
- Trust and reviews
- Transparent pricing
- Convenience

Provider ICP

Typical Technician

- Independent skilled worker
- Specializes in plumbing, electrical, AC, cleaning, etc.

- Works freelance or through referrals
- Looking for steady customer flow

Provider Motivations

- More consistent jobs
- Increased income
- Access to higher-paying customers
- Reduced customer acquisition effort

3. Service Categories & Structure

Initial Launch Categories

- Plumbing
- Electrical
- Painting
- AC Maintenance & Repair
- Cleaning Services
- & More (if the client wants a service that isn't listed, they can reach out to us and we can find someone for the job)

Future Categories

- Furniture Assembly
- Appliance Repair
- Carpentry
- Moving Services
- Smart Home Installation
- & more

Category Structure

Each category should include:

- Service title
- Description
- Pricing “starts from”
- Technician profiles
- Booking CTA

4. Customer Booking Journey

Booking Flow

Step 1 — Customer Visits Website

- Browses services
- Selects category: Electrical, Plumbing, Painting, Cleaning, AC Maintenance & Repair, & more

Step 2 — Describe Job

Customer provides:

- Issue description
- Photos if possible
- Location
- Preferred time/date
- Contact information

Step 3 — Customer Sees Available Professionals

Customer sees a list of providers for this specific service with: Photo, Price starting from, reviews, number of completed jobs, availability, specialization

Step 4 — Customer Selects Professional

Based on information provided in Step 3, the customer proceeds with the chosen professional.

Step 5 — Create a profile

Customer creates a profile with their name, picture, address, preferred payment method

Step 6 — Booking Confirmation

Two step process, after customer has created profile and selected profile and confirmed, they get an initial confirmation email with a 30 minute window for the technician/professional to accept the job after which the customer will receive a second email with the final confirmation of date and time.

Step 7 — Inspection & Final Pricing

- Technician inspects issue
- Final price confirmed through FixIt

Step 8 — Service Completion

- Job completed
- Customer confirms completion on website which then shows on both profiles, the technician's and the client's under "jobs completed" and "successful fixes ordered" respectively

Step 9 — Review & Retention

- Customer leaves rating/review for a free inspection on their next order
- Encouraged toward repeat usage

5. Provider / Professional Journey

Technician Onboarding

- Application form
- Service category selection
- Experience details
- Verification process
- ID/Criminal Record/Document upload
- Optional references/reviews

Provider Workflow

1. Receive booking
2. Accept/reject job within 30 minutes window
3. Visit customer
4. Inspect issue
5. Submit pricing to platform/admin (technicians who fail to provide pricing or funds to platform will be blacklisted regardless of circumstance and until further investigation)
6. Complete service
7. Receive payment

6. Matching Logic

Matching Factors

- Service category
- Geographic proximity
- Availability
- Technician rating
- Performance history
- Job complexity

Initial Matching

Manual/admin-assisted matching for MVP

Future Matching

Automated smart matching system

7. Pricing & Payments

Pricing Model

- Starting price shown upfront
- Estimated range after description and pictures are uploaded
- Final price confirmed after inspection

Payment Methods

MVP:

- Cash
- Instapay
- Vodafone Cash
- Online card payments? - Let's discuss this point together so I can get more clarity on ease of implementation

Future:

- Online card payments?
- Wallet integration

Platform Commission

15-20% per completed job

8. Location & Availability

Initial Service Area

- Maadi

Availability

- Same-day bookings upon availability
- Scheduled bookings
- Emergency requests with extra fee

Future Expansion

All Greater Cairo → major Egyptian cities

9. Admin Dashboard Requirements

Core Dashboard Features

Customer Management

- Booking management
- Customer profiles
- Job history

Technician Management

- Technician profiles
- Ratings
- Availability
- Performance tracking

Operations

- Assign bookings manually
- Track booking status
- Revenue tracking
- Commission tracking

Analytics

- Number of bookings

- Revenue
- Repeat customers
- Technician performance
- Category performance

10. Reviews, Ratings, Trust & Social Proofs

Trust Features

- Verified technicians badge
- Customer reviews
- Star ratings
- Before/after photos
- Testimonials

Review System

- 1–5 star rating
- Written feedback
- Post-service review prompts
- Pictures (before AND after pictures, both must be included)

11. Customer Support & Communication

Communication Channels

- WhatsApp
- Phone support
- Website inquiry forms

Notifications

- Booking confirmation
- Technician arrival updates
- Service completion notifications

Support Features

- Complaint submission
- Live support (future)
- FAQ/help center

12. Cancellations, Refunds & Disputes

Customer Cancellation

- Free cancellation before technician dispatch
- 100 EGP cancellation fee after dispatch

Technician Cancellation

- Performance penalties for repeated cancellations

Dispute Resolution

Handled internally by FixIt Egypt support/admin team

13. Subscriptions & Repeat Bookings

Future Subscription Features

- Home maintenance plans
- Priority support
- Discounted services

Repeat Booking Features

- Saved addresses
- Rebook previous technicians
- Booking history

14. Promotions & Loyalty

Initial Promotions

- First-service discounts
- Referral discounts

Loyalty Features

- Referral rewards
- Repeat customer discounts and rewards
- Seasonal campaigns

15. Technical Requirements

Website Requirements

- Mobile-first responsive design
- Fast loading speed
- SEO optimized
- Arabic + English support
- WhatsApp integration

Future Scalability

Architecture should support:

- Mobile app integration
- Automated matching
- Payment gateway integration
- CRM functionality

16. Marketplace Compliance & Legal

Requirements

- Terms & Conditions
- Privacy Policy
- Service agreements
- Technician agreements
- Liability disclaimers

Compliance Goals

- Customer data protection
- Transparent pricing practices
- Marketplace operational policies

17. Content & Branding

Brand Positioning

"Go-to online marketplace for all things home services"

Brand Personality

- Professional
- Trustworthy
- Fast
- Friendly
- Modern

Design Direction

- Clean modern UI
- Simple navigation
- High trust visuals
- Strong CTA buttons
- Mobile-first UX

Key Messaging

- Fast response
- Verified technicians
- Transparent pricing
- Reliable service

18. Launch Scope & MVP

MVP Objective

Validate demand and operational workflows before scaling.

MVP Features

- Homepage
- Service pages
- Booking/request form
- Technician profile pages
- Admin dashboard
- WhatsApp integration
- Review system
- Manual technician assignment

MVP Exclusions (Later Phases)

- Automated matching
- Full mobile apps
- Subscription engine
- AI/chatbot features
- Advanced payment systems

Final Notes

The initial version of FixIt Egypt is intentionally operations-first rather than tech-first. The website should prioritize:

- trust
- simplicity
- fast booking conversion
- operational efficiency

The goal of the MVP is not to build a complex marketplace immediately, but to create a scalable and trustworthy customer acquisition and service management platform that can evolve into a larger marketplace ecosystem over time.

Finally, everything needs to be available in English, and Arabic, for all aspects of the website.
