

PHASE 1 — MVP (Operations-First)

Goal

Launch quickly, generate bookings, validate demand, build technician network, and manage operations manually.

Success Criteria

- Customers can request services online.
- Customers can browse technician profiles.
- Customers can request a preferred technician.
- FixIt maintains full control of assignment.
- All leads and bookings are captured.
- Admin can manage bookings and technicians.

1. Website Structure

Deliverables

Homepage

Must include:

- Hero section
- Service categories
- Why Choose FixIt
- How It Works
- Reviews & Testimonials
- Service Areas
- WhatsApp CTA
- Contact Section
- Footer

Service Category Pages

Initial categories:

- Plumbing
- Electrical
- AC Maintenance

- Cleaning Services
- Furniture Assembly
- Possibility for more to be added later

Each page includes:

- Service description
- Pricing range
- FAQ
- Related technicians
- Booking CTA

About Us Page

Includes:

- Mission
- Vision
- Core Principles
- Company Story

Contact Page

Includes:

- Contact Form
- WhatsApp
- Phone Number
- Service Areas

FAQ Page

Common questions:

- Pricing
- Guarantees
- Booking process
- Service areas

2. Technician Directory

Deliverables

Technician Directory Page

Displays:

- Technician photo
- Name
- Specialty
- Rating
- Experience
- Service area

Filters:

- Category
- Area

Technician Profile Pages

Each profile includes:

- Profile photo
- Bio
- Years of experience
- Areas served
- Services offered
- Reviews
- Number of completed jobs
- Request Technician CTA

3. Hybrid Booking System

Deliverables

Service Request Flow

Customer can:

Option 1

Book through service category

Example:

Electrical

→ Request Service

Option 2

View technician profile

Example:

Ahmed Hassan

→ Request Ahmed

Booking Form Fields

Required:

- Full Name
- Phone Number
- Area
- Service Category
- Job Description
- Preferred Date
- Preferred Time

Optional:

- Photo Upload

Filled in Field:

Preferred Technician

Example:

Ahmed Hassan

Assignment Logic

Customer can request technician.

FixIt retains final assignment authority.

Example:

Customer requests Ahmed.

If available:

- Ahmed assigned

If unavailable:

- Admin assigns equivalent technician

Customer notified via WhatsApp

Acceptance Criteria

System records:

- Requested technician
- Assigned technician

Both visible inside dashboard.

4. Booking Management Dashboard

Deliverables

Admin Login

Booking Management

View:

- New Bookings
- Assigned
- In Progress
- Completed
- Cancelled

Actions:

- Assign Technician
- Edit Booking
- Update Status

Customer Management

Admin View: (System checks for similar information since we won't have customer accounts at this stage, idea is to keep internal records on returning customers)

- Customer records
- Booking history

Technician Management

Add:

- Technician

Edit:

- Profile
- Availability

Deactivate:

- Technician

5. Reviews & Social Proof

Deliverables

Customer Reviews

- Star rating
- Written review

Testimonials Section

Homepage testimonials

Verified Technician Badge

Admin-controlled badge

6. WhatsApp Integration

Deliverables

After booking or clicking on WhatsApp CTA/more information

Customer redirected to WhatsApp.

Admin receives:

- Booking notification
- Customer information

7. Technical Deliverables

Mobile Responsive

Desktop

Tablet

Mobile

SEO Setup

- Meta titles
- Meta descriptions
- Sitemap
- Robots.txt

Analytics

- Google Analytics
- Google Search Console

8. Ownership Deliverables

Developer must transfer:

- Domain ownership
- Hosting ownership

- Website ownership
- Admin credentials
- Analytics credentials

Documentation

Video walkthrough covering:

- Adding technicians
- Editing services
- Managing bookings

PHASE 2 — MARKETPLACE EXPANSION

Goal

Reduce manual work, increase automation, improve retention, and create scalable marketplace infrastructure.

Success Criteria

- Customers can manage bookings.
- Technicians can manage jobs.
- Matching becomes semi-automated.
- Payments and commissions become trackable.

1. Customer Accounts

Deliverables

Customer login

Customer dashboard:

- Booking history
- Saved addresses
- Favorite technicians
- Rebook services

2. Technician Portal

Deliverables

Technician login

Dashboard:

- Upcoming jobs
- Job history
- Earnings
- Availability

Technician Actions

Accept booking

Reject booking

Update status

Upload job photos

3. Automated Matching Engine

Deliverables

Matching based on:

- Category
- Area
- Availability
- Rating
- Job history

Hybrid Logic Maintained

If customer requests Ahmed:

System checks availability.

If unavailable:

Suggest alternatives.

4. Internal Messaging

Deliverables

Customer ↔ Technician chat

Platform-controlled communication

5. Online Payments

Deliverables

Support:

- Credit Cards
- Debit Cards
- Instapay
- Wallets

Payment Tracking

Track:

- Job value
- Commission
- Technician payout

6. Commission Engine

Deliverables

Automatic calculation of:

- Gross job value
- FixIt commission
- Technician payout

7. Loyalty & Referrals

Deliverables

Referral program

Customer rewards

Discount credits
